

## **2000 ATAC Innovation Award Winners**

### **MONCTON FLIGHT COLLEGE**

MFC has developed a training program for flight instructors that increased the overall skill level and grade assessment. These higher quality instructors will pass on their skills to student pilots, which will improve the overall piloting abilities.

### **COASTAL PACIFIC AVIATION/UNIVERSITY COLLEGE OF THE FRASER VALLEY**

Coastal Pacific Aviation was the first flight training centre in Canada to partner with a university to offer a combined program of higher education. This program with its University discipline and use of advanced training, including full motion simulation, serves as an example for other aviation companies to strive to attain.

### **TORONTO AIRWAYS LTD./FLYING COLORS PILOT TRAINING**

Partnering, while a modern buzzword, is important to the aviation industry as different companies with different resources form alliances to promote or improve their product. Flying Colors and Toronto Airways are a good example of this modern trend of partnering with the sharing of information and the development of VFR Simulation training.
